EXPERIENCE

Senior AI Engineer

Nov 2025 – Present

Xpergia

Mumbai, India

- Led development of AI-based insights/tips generation based on live football data for a sports and media client
- Developed APIs and core business logic to consolidate historical and real-time game data from an external source
- Designed and developed logic to generate and serve real-time tips using a websocket-based data ingestion pipeline and a scalable, light, configuration-based workflow for tip generation.

Consultant

Nov 2020 – Jun 2024

Deloitte Digital USI

Mumbai, India

- Designed & developed REST APIs using FastAPI, PostgreSQL, and Llama served over AWS to answer user questions about live quantitative enterprise KPI data for a pharmaceutical manufacturing client
- Developed use-cases and AI-adoption strategies for AI-aspirant enterprise clients
- Conducted Deep Learning training sessions as part of a Democratize AI initiative, enabling wider AI adoption within teams

Research Assistant

June 2018 – Sept 2018

Information Sciences Institute, University of Southern California

Waltham, MA

- Studied correlation between different evaluation metrics for machine-translation in cross-lingual search engines

Research Engineer

Aug. 2015 – Jul. 2016

Indian Institute of Technology Bombay

Mumbai, India

- Trained and deployed phrase-based statistical machine translation systems for English-Marathi and English-Indonesian using medical-domain textbooks
- Designed an error analysis engine to identify and classify syntactic errors in translations, and developed a greedy algorithm for automatic post-editing, evaluated via BLEU scores and human evaluators

EDUCATION

University of Massachusetts Amherst

Amherst, MA

Master of Science in Computer Science, GPA: 3.21

Aug 2016 – May 2019

D. J. Sanghvi College of Engineering, University of Mumbai

Mumbai, India

Bachelor of Engineering, First class

Aug 2011 – Jun 2015

TECHNICAL SKILLS

Languages: Python, Rust, SQL

Frameworks/Libraries: FastAPI, streamlit, pytorch, pandas, numpy, scikit-learn, langchain

Developer Tools: Git, Docker, Copilot

Cloud Platforms: AWS, Azure

PROJECTS

Alfred: LLM powered hyper-personalized notifications | Llama

Jan 2024

- Developed a proof of concept to track users' plain-language notification preferences based on live-data events

LegalEase: Cross-lingual semantic search engine | Cohere, Qdrant

Mar 2023

- Developed an application that answers questions factually based on lengthy legal documents (now called RAG) as well as a multi-lingual semantic search engine for any-language-query to any-language-document retrieval
- Was a finalist in the Semantic Search hackathon co-organised by lablab.ai

Semantic Segmentation in cardiac MRI images | Keras, Tensorflow

2016

- Developed a CNN model for semantic segmentation to find the boundary of the right ventricle in cardiac MRI images to predict cardiomyopathy

The challenges of optimizing machine translation for low-resource CLIR | *EMNLP '19*

Constantine Lignos, Daniel Cohen, Yen-Chieh Lien, Pratik Mehta, W Bruce Croft, Scott Miller

The IIT Bombay English-Hindi parallel corpus | *LREC '18*

Anoop Kunchukuttan, Pratik Mehta, Pushpak Bhattacharyya

Investigating the potential of post-ordering SMT output to improve translation quality | *ICON '15*

Pratik Mehta, Anoop Kunchukuttan, Pushpak Bhattacharyya
